

## **SPECIAL NEEDS POLICY**

I am willing to accept children with special needs including special educational needs and disabilities but would first ask parents to discuss with me the needs of each individual child in order for me to decide if I am able to provide the care needed.

My property is not suitable for wheelchair access and unfortunately I would be unable to provide care for a child who needs constant one to one attention as I have to consider the other children in my care.

If during my care I identify that a child may have special needs I would discuss my observations with parents and would offer my help and support where required to help the child. Any such observations and discussions would remain confidential (please see my confidentiality policy).
